

14 MASTER'S DEGREE PROGRAMME IN SUSTAINABLE ART AND DESIGN (AAD)

PROGRAMME CONTENT

The Sustainable Art and Design (AAD) master's programme has been developed to respond to the changing role of the creative professional in society. The content is designed to harness the potential of socially engaged art and service design in social, community or business contexts. Community arts and service design are used by our students to work with clients and community groups to identify problems and create solutions - It's creative collaboration.

During the degree, students will develop their skills and competence in:

- collaborative and interdisciplinary working
- community and environment-centred art and design
- enhance sustainability through art and design
- advanced skills in project design and management
- research and evaluation skills in art and design.
